

# NEW ITEMS APRIL 2015 THE RADIANT KRUPP

0270 98 Borgward Bus B611

0412 01 Flatbed truck (Henschel HS 14/16)

0800 12 Taxi - Volvo 850 station wagon

0071 18 Emergency vehicle - VW Touareg

0693 24 THW - Unimog U 411

0620 01 Fire service - fire ladder truck (Ford FK 2500)

0864 35 Police - prisoner transportation vehicle (Opel Blitz)

0424 03 Flatbed dumper (Henschel)

0612 48 Fire service - Rosenbauer AT RLFA-T (MAN TGM)

0534 02 Fodder tractor-trailer (Krupp)

It's the mixture of vehicles that does the trick – WIKING presents a plethora of themes! This time, revitalized forms take center stage. Almost five decades after their creation, they allow for many attractive new models. The model variety of the April range starts with the radiantly yellow Krupp as the "Deuka" fodder tractor-trailer that brings back some of rural aura of the 1960s. With a fine finishing and a roof rack, the Borgward Bus B611 is all set to take to the road. And new

emergency vehicles also enhance the pleasure the classics can give. The Ford FK 2500 makes its debut as a compact turntable ladder; Unimog U 411 as a THW tractor; and the Opel Blitz as a prisoner transport vehicle with a history of prototypes on the streets of Berlin. In addition, celebrating their premiere are the Henschel forward control truck generation of the 1960s with the flatbed truck in the colors of the former "Kassel"-based firm and as a flatbed dumper in the company colors of "Glück".

Another unforgettable feature is the incredible spaciousness of the Volvo 850 – WIKING has dedicated a contemporary taxi to it. The latest arrivals in the range are the VW Touareg as an emergency vehicle and the Rosenbauer AT series as RLFA-T on a MAN TGM chassis.

# MODEL UPGRADES APRIL 2015

## GARDEN FANS DRIVE A MINIBUS

2170 01 Gift box -VW T1

"VW T1" model set

0099 05 Fiat 600

0224 03 Renault R4

0830 15 VW split window Beetle

0861 29 Fire service - VW T2 bus

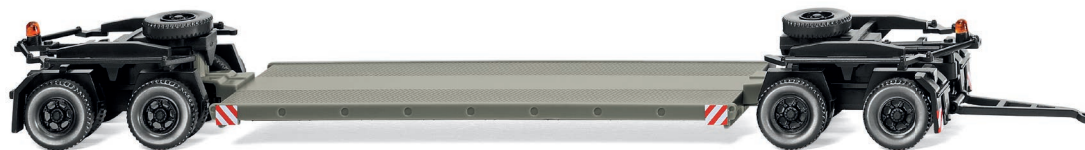

0382 02 Vacuum barrel trailer

0540 04 Box truck (MAN 415)

0642 05 Street sweeper (MB)

0851 34 Low-loading trailer (Scheuerle)

0950 02 Container tractor-trailer (Henschel) N-gauge 1:160

Model updating makes for a fresh spring breeze in miniaturization with the snappy yellow Fiat 600. But the ruby-colored Renault R4 and the matte-gray split-window Beetle are reminiscent of the legendary family automobiles of the 1950s and 1960s that have long since found their permanent place in the chronology of classics by WIKING. Both the VW T2 as a fire service bus loaded with equipment on the roof and the MAN 415 as "Danzas" box truck tie in with this tradition. The Scheuerle low-loading trailer in "Heitkamp" colors carry forward the theme of the construction site so popular among model

fans just as seamlessly as the Mercedes-Benz as a street sweeper in bright "Bölling" colors does. Speaking of agriculture, the vacuum barrel trailer with mighty Terra tires will join the program. All WIKING friends will delight in the special edition of the VW T1 model set, because the minibus quartet brings to life a brand history long gone but never forgotten. In so

doing, the experts of the tradition-rich model maker not only recall the "Kiel"-based branch of WIKING but also the "Gartenfreund" – a game set from the early years. Models in the legendary design of the "Wimo-Sip" and with the soluble model glue "Fixogum" make the T1 series complete. For the friends of the N-gauge scale, WIKING has miniaturized the Henschel as "Interpool" container semi-truck.

0773 47 Claas Scorpion 7044 telescopic loader

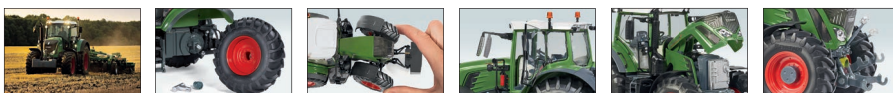

For the first time, WIKING presents a telescopic loader based on the prototype of the Claas Scorpion 7044. They have miniaturized the entire functionality of this agile implement – of course, fully telescopic. The precision model with its rugged and stable metal chassis has two steerable axles that keep the turning radius especially small. The detailed cab gives a hint of the complete maneuverability of the original.

0773 45 Fendt 828 Vario (2014)

Imaginative and enriching the scale – 1:32 model enthusiasts get even closer to the reality of farming with the new Fendt 828 Vario. For the first time, the precision miniature has four interchangeable wheels – an enclosed key makes for smooth and easy wheel changes. The Fendt 828 Vario demonstrates the creativity with which WIKING expands its range of premium large-volume precision models.

0778 14 Valtra T214

With the Valtra T214, WIKING celebrates a design premiere in 1:32! The rear hydraulics were developed such that the length of the movable upper link can be adjusted. The attached device can be hooked in at the end of the upper link, while the piston ensures the desired orientation of the attached devices of the agricultural machine by means of a combined grating – delivering an even greater level of authenticity. The precision miniature features four interchangeable wheels.

0431 42 Fire service - Rosenbauer AT (MAN TGM)

The WIKING model of the Rosenbauer AT series miniaturizes the operational functions of its great prototype – precise and rich in detail. Once again, Rosenbauer sets the benchmark, because both in design and functionality, the impressive 1:43 miniature follows all those details that the firemen appreciate in their everyday work. The compact rescue and fire-fighting vehicle also has transparent cab doors and a pump operating station, all reproduced down to the tiniest detail.
