WIKING CONTROL 87

RADIO CONTROLLED

0774 20 00 - FLF Panther 6x6 (Rosenbauer) fire engine

When the mighty Rosenbauer Panther 6x6 races up at full tilt, it demonstrates the fascinating power of WIKING CONTROL 87 perfectly. The work of a fire service vehicle becomes reality with this realistic model! This is the first time the successful high-end technology has been used in a remote-controlled model on a scale of 1:87 and this imposing airfield fire truck will certainly add to its appeal and allow even more driving enjoyment. Hidden inside the Panther 6x6 is an advanced high-tech system: two servomotors enable finely tuned steering control and ensure realistic flexibility of movement. Remote-controlled blue lights, headlights and sirens make the authenticity of WIKING CONTROL 87

complete. The longlife lithium-polymer microbattery and the powerful motor bring excellent manoeuvrability while guaranteeing perfect traction, thus redefining the big world of model vehicles. And that's not all: just one remote control can be used to control a number of models if required. So WIKING has succeeded in giving enthusiasts a new dimension to passion on a scale of 1:87: one which is realistic, unmissable and unmistakable.
