

# NEW ITEMS DECEMBER 2014

## THE HIGH-TECH TRIO

0774 27 Box truck (MAN TGL)

0774 28 Flatbed truck (MAN TGL)

0774 29 Compactor garbage truck (MAN TGL)

**W**IKING**CONTROL87** makes additions to its modelmaking high-tech system with three more new miniatures: The MAN TGL will be driving in the future across the desk and dioramas as a DHL box truck, a flatbed truck in the colors of “Dachser” and also as a compactor garbage truck. A decisive advantage for all fans of WIKING**CONTROL87**: An even better combination of models and radio remote control will be possible because all system components are available individually.

**M**ore miniaturized everyday world, greater authenticity – WIKING**CONTROL87** makes the remote-controlled 1:87 scale even more versatile with this new, attractive model trio. The precision control unit can be used on a shared and variable basis, making each individual vehicle the object of modelmaking fascination – the big and wide world of little miniatures throws a spell over you with their enormous vitality. High-tech makes it possible: perfect steering maneuvers at realistic speeds as well as switchable lighting and driving noises  can be easily performed by the driver with the handy remote control. With ideal traction, the long-lasting lithium-polymer micro-battery makes the miniatures surge forward powerfully and with great agility. Thus WIKING succeeds in a new dimension of automotive enthusiasm in modelmaking in 1:87 scale.
