

NEW MODELS FOR JUNE 2009 CLASSICS WITH SPIRIT

0808 08 25 BMW Isetta 4WD

0064 03 29 VW Passat saloon

0060 37 34 VW Touareg

0799 24 27 MB 230 SL cabriolet

0899 03 26 Fendt Farmer 2

0800 06 29 Opel Rekord D

0797 05 30 VW T1 funeral van

0097 39 38 MB G car/trailer combination with Arabella

0947 01 25 Log transporter (Büssing 8000) N-GAUGE 1:160

WIKING's new models for June cover a wide range of topics to delight avid collectors ranging from the very latest vehicles such as the saloon version of the VW Passat to models with a very special appeal. After all, WIKING has created the VW Touareg in the colours of the VfL Wolfsburg supporters club after a dynamic season in the Bundesli-

ga. In the meantime, on its way to a summer vintage car rally is the car/trailer combination of the Mercedes Benz G-class towing a Borgward Arabella as its valuable cargo. Two contemporary classics - the anniversary model of the Farmer 2 in the form of the legendary "Gold Fendt" and the VW T1 as a funeral van - show that joy and sorrow are never far apart even on a scale of 1:87.

We also see the reappearance of the revitalised Mercedes Benz 230 SL cabriolet joined by the Opel Rekord D as a shiny youngtimer in the ivory taxi cab livery which had just been introduced in its day.

MODEL UPGRADES FOR JUNE 2009 GIANT MODELS

0693 12 43 Technical emergency service set (MAN TGS)

0529 04 46 Truck and large-capacity trailer (MB Actros)

0430 02 00 FLF Panther 6x6 (Rosenbauer) 1:43 scale

With WIKING's model upgrades for June, the main attractions are all large-scale giant models. One of the items which is to become available from specialist shops is a technical emergency service set with two movable storage containers which show just how flexible the technical emergency service can be. In accordance with the requirements for disaster control, WIKING has included a TES aid worker and Rosenbauer portable fire pump as part of the model set.

The wealth of detail and the functionality of the composition will enable collectors to simulate a realistic scenario. The Stiebel Eltron brand is one of the long-cherished names which the traditional model-makers at WIKING have continued to celebrate by creating models to mark milestones in their history. True to form, they have now created a Mercedes-Benz Actros with large-capacity trailer bearing Stiebel Eltron's very latest corporate design. Another trump card among the new

models for June is the Rosenbauer Panther 6x6 on a scale of 1:43. WIKING has produced this model airfield fire truck in the livery of Newcastle airport, the largest regional airport in the north-east of England, where it is stationed and guarantees the safety of all flights getting ready to take off for international destinations.
